JADEED RIFAH

REHAB & CARE CENTER — KHANEWAL

SMART REHAB MANAGEMENT ERP

Complete Software Requirements Specification (SRS)

Roman Urdu Developer Brief

Yeh document software engineer / software house ko project scope, modules, workflows, security aur delivery requirements samjhanay ke liye tayar kiya gaya hai.

Project Detail	Requirement
Organization	Jadeed Rifah Rehab & Care Center, Khanewal, Punjab, Pakistan
System Type	Custom Web-Based ERP + Rehabilitation / Hospital Management System
Current Capacity	30 beds (future mein configurable)
Treatment Program	30, 60 aur 90 days; duration configurable
Currency / Language	PKR; Urdu + English interface
Primary Authority	Owner / Chairman
Daily Operations	General Manager + Department Supervisors
Document Version	1.0 — Initial Developer Requirements

CONFIDENTIAL — For software development proposal and implementation

1. Project ka Maqsad

Jadeed Rifah Rehab & Care Center ke liye aik centralized, secure aur scalable management software develop karna hai. Yeh sirf patient registration ya accounting application nahi hogi. Is mein patient care, clinical records, staff, finance, pharmacy, kitchen, inventory, compliance, approvals aur daily operations aik hi platform par manage honge.

- Owner institution mein mojood na ho tab bhi routine operations General Manager aur supervisors ke zariye chal sakein.
- Owner mobile ya computer se live reports, pending approvals aur important alerts dekh sake.
- Har department ke kaam, zimmedari, deadline aur verification ka record ho.
- Medical decisions qualified healthcare professionals ke paas rahen; software clinical staff ka replacement na ho.
- Tamam financial aur sensitive records ka audit trail aur secure backup ho.

2. Institution ki Initial Configuration

Field	Initial Value / Rule
Institution Name	Jadeed Rifah Rehab & Care Center
Location	Khanewal, Punjab, Pakistan
Nature	Private rehabilitation and psychiatric care center
Bed Capacity	30; system mein future capacity change ho sakay
Programs	30 / 60 / 90 days; configurable
Currency	Pakistani Rupee (PKR)
Languages	English aur Roman Urdu/Urdu support; interface localization configurable
Owner Role	Owner / Chairman
Daily Operations Head	General Manager / Administrator

Note: Institution ki registration details, PHC registration number, address, phone numbers, fee packages aur staff details Admin Settings se update ki ja saken. Inhein code mein hard-code na kiya jaye.

3. Platform aur Technical Requirements

- Custom web application ho; sirf WordPress website ya ready-made template ko ERP keh kar deliver na kiya jaye.
- Recommended stack: React / Next.js frontend, Laravel ya Node.js backend, PostgreSQL database.
- Responsive design: desktop, laptop, tablet aur Android mobile browser par kaam kare.
- PWA option ho taa-ke mobile par app jaisa experience milay. Native Android/iOS app future phase mein ban sakay.
- REST API ya documented equivalent API ho; future integrations mumkin hon.
- Secure cloud hosting, HTTPS/SSL, automated deployment aur staging/test environment ho.
- PDF, Excel aur print reports support hon.
- Source code, database schema, API documentation aur deployment instructions Owner ko handover hon.

4. User Roles aur Access Control

Har user ka apna username, password aur role ho. Role-Based Access Control (RBAC) ke zariye har module aur action ki permission alag configure ho.

Role	Basic Access
Owner / Chairman	Full visibility; final approvals; system settings; audit reports
General Manager	Daily operations; departments; assigned approvals; daily reports
Administrator	Admissions, duty rosters, visitors aur routine administration
Psychiatrist / Doctor	Apne authorized patients ke clinical records, assessments aur orders
Psychologist	Psychology assessment aur therapy notes; restricted clinical access
Nurse	Nursing observations, vitals, handover aur medication administration
Accountant	Fees, vouchers, ledgers, cash/bank aur financial reports
HR Officer	Employee files, attendance, leave aur payroll preparation
Pharmacist	Medicine inventory, batch, expiry, issue aur controlled-drug register
Kitchen / Canteen Manager	Food stock, menu, purchases aur canteen transactions
Gate / Security Staff	Visitor entry aur authorized security records

- Permissions: View, Add, Edit, Submit, Approve, Reject, Print, Export aur Delete/Archive alag alag hon.
- Sensitive medical/psychological records sirf authorized professionals ko nazar aayen.
- Financial user clinical notes access na kar sakay; kitchen user patient medical file access na kar sakay.
- Employee account deactivate honay par access foran band ho, lekin us ka historical audit record mehfooz rahe.
- Owner ke ilawa kisi ko apna role ya approval limit khud change karne ka ikhtiyar na ho.

5. Main Menu — 35 Modules

01. Owner / Chairman Dashboard

Institution overview, active patients, admissions, discharges, bed occupancy, daily/monthly income, expenses, cash/bank balance, outstanding fees, staff attendance, pending approvals, alerts, department performance.

02. CEO Control Center

Daily operations monitoring, department scorecards, General Manager performance, pending decisions, approval queue, owner instructions, delegation, risk reports, Owner Away Mode.

03. General Management

Daily operations, department supervision, staff coordination, shift closing, pending work, complaints monitoring, daily/weekly management reports.

04. Task & Duty Management

Create/assign tasks, recurring tasks, deadlines, priority, status, evidence upload, supervisor verification, reminders, overdue escalation, task history.

05. Staff Attendance

Check-in/out, shift roster, biometric integration, approved mobile attendance, late/absence, correction request, monthly attendance reports.

06. HR & Employee Management

Employee profile, CNIC and contact details, qualifications, professional registration, documents, appointment, probation, department, leave, warning, resignation, termination, performance.

07. Payroll & Salary Management

Salary structure, allowances, overtime, approved deductions, advance, payroll run, salary payable, approval, payment record, payslip and reports.

08. User & Permission Management

User creation, role assignment, module/action permissions, activation/deactivation, password reset, MFA, login history, access logs.

09. Patient Registration

Unique patient ID, demographic details, guardian, emergency contact, photo/documents, referral source, registration history and duplicate check.

10. Patient Admission

Admission request, date/time, assessment, guardian/consent documents, belongings inventory, bed allocation, package selection, admission approval.

11. Patient Management

All/active/discharged patients, patient profile, admission history, transfers, status, authorized documents, complaints, incidents and search.

12. Medical Records

Medical history, assessment, diagnosis by qualified clinician, clinical notes, vitals, doctor orders, prescriptions, lab reports, emergency notes and discharge summary.

13. Doctor Management

Doctor profiles, credentials, duty schedule, attendance, patient visits, assessments, orders, prescriptions, emergency visits and reports.

14. Psychology Management

Psychologist profiles, authorized assessments, individual/group sessions, CBT records, family counselling, progress, relapse-prevention and therapy history.

15. Nursing Management

Nursing roster, handover, observations, vital signs, MAR, nursing notes, doctor orders, complaints, emergency escalation and shift reports.

16. Pharmacy & Medicine Store

Medicine catalogue, supplier, purchase, stock, batch, expiry, issue/return, patient-wise administration linkage, wastage, low-stock alerts and controlled medicine register.

17. Laboratory Management

Test catalogue, orders, sample collection, status, reports upload, authorized verification, charges, pending tests and patient test history.

18. Treatment & Recovery Program

30/60/90-day configurable programs, clinician-approved treatment plan, daily activities, therapy sessions, progress assessments, aftercare planning.

19. Patient Discharge & Aftercare

Discharge request, clinician assessment/approval, final summary, fee clearance, belongings handover, family handover, instructions and follow-up schedule.

20. Bed & Room Management

Room/bed catalogue, availability, occupancy, allocation, transfer, cleaning, maintenance and occupancy reports.

21. Patient Fee & Billing

Fee packages, admission/monthly fees, lab/additional charges, discounts, advance/partial payments, refunds, outstanding balance, receipt and collection reports.

22. Accounts & Finance

Cash book, bank book, chart of accounts, income/expense, general/patient/supplier ledgers, receivable/payable, vouchers, bank reconciliation, trial balance, P&L;, balance sheet, cash flow.

23. Purchase & Supplier Management

Purchase request, quotation, supplier records, purchase order, goods received, invoice, approval, payment status and supplier ledger.

24. Inventory & Stock Management

Stock categories, item catalogue, opening stock, stock in/out, transfers, reorder level, physical count, wastage, adjustment approval and stock reports.

25. Kitchen Management

Daily menu, patient/staff meal counts, raw material, purchase, consumption, wastage, hygiene checklist and per-person food cost.

26. Canteen Management

Patient canteen accounts, family deposits, sales, purchase, stock, returns, daily cash closing and profit/loss.

27. Assets & Maintenance

Asset register, asset ID, purchase date/cost, location, assigned custodian, maintenance schedule, repair history and depreciation policy.

28. Family & Visitor Management

Guardian contacts, visitor registration, visit permission/schedule, call permission/log, complaints, feedback and authorized family updates.

29. PHC & MSDS Compliance

Registration details, applicable indicators, policies, SOPs, evidence, responsible person, review dates, internal audit, corrective action and inspection file.

30. Reports, Analytics & AI Manager

Operational reports, financial analytics, trends, management summaries, natural-language questions over authorized data and anomaly alerts.

31. Complaint & Incident Management

Complaint/incident intake, category, severity, assigned investigator, action plan, deadlines, resolution, escalation and closure approval.

32. CCTV & Security Management

Camera inventory/status, authorized access log, security incident register, gate log and retention policy; no cameras in private patient areas.

33. Digital Documents & Printing

Admission forms, consent forms, receipts, prescriptions, discharge summaries, HR letters, vouchers, PDF/Excel export and document archive.

34. Notifications & Alerts

In-app notifications, email/SMS/WhatsApp integration, alert preferences, delivery logs, escalation and privacy-safe message templates.

35. System Settings & Backup

Institution settings, branches, fee/tax settings, roles, numbering, templates, integrations, backup, restore, audit logs and system health.

6. Common Buttons aur Standard Functions

Jahan relevant hon, har module mein common actions consistent hon:

- Add New / Create
- View Details
- Edit / Update
- Save Draft
- Submit for Approval
- Approve / Reject
- Print
- Export PDF
- Export Excel
- Search / Filter
- Archive / Deactivate
- View History / Audit Trail

Delete ka option sensitive records mein default tor par band ho. Financial, clinical aur compliance records ko hard-delete na kiya jaye; correction/void/archival process aur reason required ho.

7. Core Workflows

7.1 Patient Admission Workflow

- Registration clerk patient ka unique ID create kare aur duplicate record check ho.
- Guardian/emergency contact aur required documents enter hon.
- Authorized clinician initial assessment aur admission suitability record kare.
- Consent aur applicable legal documents complete hon.
- Admin available bed aur approved package assign kare.
- Billing module patient account aur receipt create kare.
- Admission complete honay par relevant departments ko task/notification mile.

7.2 Daily Patient Care Workflow

- Duty roster ke mutabiq staff shift start kare.
- Nursing team assigned observations aur handover record kare.
- Doctor clinical review aur orders record kare.
- Medicine sirf valid authorized order ke mutabiq administer ho; MAR mein actual time aur staff record ho.

- Psychology sessions scheduled hon aur authorized notes record hon.
- Critical observation ya emergency par duty clinician ko immediate alert aur escalation ho.

7.3 Patient Discharge Workflow

- Discharge request initiate ho.
- Authorized clinician final assessment aur discharge instructions approve kare.
- Admin belongings aur family handover record kare.
- Accounts outstanding balance ya approved settlement record kare.
- Discharge summary aur aftercare plan generate ho.
- Patient status discharged ho, magar historical data preserve rahe.

7.4 Expense Approval Workflow

- Employee purchase/expense request submit kare with purpose, amount and supporting evidence.
- Department supervisor budget aur need verify kare.
- Accountant invoice/receipt aur account head check kare.
- Configured amount limit ke mutabiq General Manager ya Owner approval required ho.
- Payment record bank/cash transaction se link ho.
- Voucher number aur audit trail automatically generate ho.

7.5 Task Escalation Workflow

- Task responsible employee ko assign ho.
- Deadline se pehle reminder aaye.
- Deadline miss honay par supervisor ko alert ho.
- Further delay par General Manager ko escalation ho.
- Critical overdue tasks Owner dashboard par show hon.
- Task completion ke liye evidence aur supervisor verification required ho.

8. Owner Away Mode — Remote Management

Owner Away Mode aik configurable delegation feature ho. Owner jab institution se bahar ho to nominated General Manager ko sirf defined routine authority mile. Is mode se Owner ki ownership ya final authority transfer na ho.

- Owner Away Mode start/end time aur nominated acting manager record kare.
- General Manager routine roster, approved purchases, operational tasks aur department coordination manage kar sakay.
- Approval limits Owner settings mein define hon; limit se upar Owner approval required ho.
- Medical emergencies mein on-duty qualified clinician apne professional scope ke andar foran action le; Owner approval ka intezar na ho.
- Owner ko important exceptions, high-value approvals, complaints aur critical incidents ki notification mile.
- Away Mode ki tamam actions aur delegated permissions audit log mein record hon.
- Owner kisi bhi waqt delegation revoke kar sakay.

9. AI Manager Requirements

AI Manager ko administrative assistant aur analytics tool ke tor par develop kiya jaye. AI ko independent clinical decision maker ya autonomous financial approver na banaya jaye.

- Owner natural language mein sawal kar sakay: 'Aaj ki collection aur expenses kya hain?'
- Daily/weekly/monthly management summaries generate hon.
- Budget se zyada expense, overdue fee, low stock aur overdue task ki anomaly identify ho.
- AI har jawab ke sath data period aur source/report ka reference de.
- AI sirf current user's authorized data access kare.
- Sensitive patient data external AI service ko bhejnay se pehle privacy/security assessment aur suitable safeguards hon.
- AI diagnosis, prescription, medication change, discharge ya emergency treatment decision na kare.
- AI koi payment, staff termination, refund ya record deletion khud execute na kare; approval workflow required ho.

10. Finance aur Accounting Controls

- Double-entry accounting support ho aur chart of accounts configurable ho.
- Har receipt, payment aur journal entry ka unique reference number ho.
- Cash aur bank balances transaction se reconcile hon.
- Patient ledger billing aur received payments se automatically update ho.
- Refund, discount, write-off aur expense reversal ke liye reason aur approval required ho.
- Closed accounting period ko authorized reopening ke baghair edit na kiya ja sakay.
- Daily cash closing aur bank reconciliation report ho.
- Reports mein PKR formatting aur date filters hon.
- Tax/accounting configuration Pakistan ke applicable rules ke mutabiq accountant se validate karwai ja sakay.

11. PHC, MSDS aur Compliance Requirements

- PHC registration details aur certificate expiry/renewal reminders.
- Applicable MSDS indicators ki configurable checklist; indicator count ya wording ko current official PHC requirements se verify kiya jaye.
- Har indicator ke sath status, owner, responsible person, evidence file, review date aur corrective action ho.
- Policies/SOPs version control ke sath store hon.
- Staff credentials, training aur professional registration expiry alerts hon.
- Infection prevention, fire safety, emergency preparedness, patient rights, consent, complaints aur incident records manage hon.
- Internal audit aur inspection preparation reports export ho saken.
- Software compliance evidence organize kare; PHC approval ya compliance ki guarantee na de.

12. Reports and Analytics

Report Category	Required Reports
Patient	Active patients, admissions, discharges, occupancy, program status, follow-up due
Clinical	Doctor visits, observations completion, medication administration exceptions, incidents
Finance	Daily collection, expenses, cash/bank, receivables, payables, P&L;, cash flow
HR	Attendance, absences, leave, payroll, pending salaries, overtime
Pharmacy	Current stock, low stock, expiry, purchases, issues, wastage
Kitchen/Canteen	Meal cost, stock consumption, wastage, sales, cash closing

Report Category	Required Reports
Compliance	Indicator status, missing evidence, overdue reviews, corrective actions
Management	Tasks completed/overdue, department performance, approval queue, daily summary

13. Notifications and Integrations

- In-app alerts default hon.
- Email/SMS/WhatsApp Business integration optional ho aur provider cost alag quote ki jaye.
- Critical medical alert duty team ko defined escalation ke sath jaye.
- Owner ko high-priority exceptions aur pending approvals milen.
- Routine alerts ko digest/summary mein combine karne ka option ho.
- WhatsApp/SMS par sensitive diagnosis, psychology notes ya detailed medical information send na ho; secure portal link ya generic notification use ho.
- Notification delivery status aur failed messages ka log ho.

14. Data Security, Privacy aur Backup

- HTTPS/SSL aur encryption in transit; sensitive data at rest encryption.
- Strong password policy, optional/required MFA for privileged users.
- Role-based access aur least-privilege permissions.
- Audit log: kis user ne, kab, kis record par kya action kiya.
- Automatic daily backup aur separate off-site backup.
- Backup restore ka regular test aur documented recovery plan.
- Session timeout, login attempt limits aur suspicious login alerts.
- Data export sirf authorized users ke liye aur export log ke sath.
- Retention, consent, correction aur data-sharing policies applicable Pakistani laws/regulations aur professional requirements ke mutabiq review hon.
- CCTV privacy: bathrooms, changing areas aur private spaces mein cameras bilkul na hon; access aur retention restricted ho.

15. Database Design — Minimum Entities

Developer detailed ERD (Entity Relationship Diagram), table definitions, keys aur relationships provide kare. Minimum entities:

- Users, Roles, Permissions, UserSessions, AuditLogs
- Employees, Departments, Qualifications, Attendance, Shifts, Leave, Payroll
- Patients, Guardians, PatientDocuments, Admissions, BedAllocations, Discharges
- MedicalAssessments, ClinicalNotes, Vitals, DoctorOrders, Prescriptions
- PsychologyAssessments, TherapySessions, NursingNotes, MedicationAdministration
- Medicines, MedicineBatches, Suppliers, Purchases, StockMovements, MedicineIssues
- LabTests, LabOrders, LabResults
- FeePackages, Invoices, Payments, Refunds, PatientLedgers
- ChartOfAccounts, JournalEntries, CashAccounts, BankAccounts, Vouchers

- Tasks, TaskAssignments, Approvals, Notifications
- Rooms, Beds, Visitors, Complaints, Incidents
- KitchenItems, Menus, MealCounts, CanteenSales, Assets, Maintenance
- ComplianceIndicators, EvidenceFiles, Policies, SOPVersions, CorrectiveActions
- Branches, SystemSettings, BackupLogs, IntegrationLogs

Data model mein created_at, updated_at, created_by, updated_by aur relevant status/history fields hon. Sensitive records ke liye version/history support ho.

16. UI/UX Design Requirements

- Professional, clean aur simple interface; desktop aur mobile responsive.
- Institution branding, logo, colors aur contact details configurable hon.
- Left-side navigation ya suitable mobile menu; 35 modules role ke mutabiq visible hon.
- Dashboard cards, search, filters, tables aur clear status labels hon.
- Forms mein required-field validation, confirmation aur helpful error messages hon.
- Roman Urdu/English ya Urdu localization ka option; Urdu ke liye right-to-left layout support.
- Print layouts A4 aur receipt printer formats ke liye suitable hon.
- Accessibility aur readable font sizes ka khayal rakha jaye.

17. Development Phases

Phase	Scope	Deliverable
1	Discovery and requirements	Approved SRS, workflows, project plan
2	UI/UX and prototype	Approved screen designs and clickable prototype
3	Database, login and permissions	Database schema, roles, secure login
4	Patient and clinical core	Registration, admission, medical, psychology, nursing
5	Finance and HR	Billing, accounting, attendance, payroll
6	Department operations	Pharmacy, lab, kitchen, canteen, inventory, visitors
7	Compliance and documents	PHC checklist, SOP library, PDF/Excel reports
8	Automation and AI	Tasks, alerts, management summaries, AI assistant
9	Testing and launch	UAT, security test, training, production deployment

18. Testing and Acceptance Criteria

Har phase ki payment se pehle Owner ya nominated representative User Acceptance Testing (UAT) kare. Minimum tests:

- Patient registration, duplicate check, admission, bed allocation aur discharge.
- Fee invoice, partial payment, receipt, refund approval aur patient ledger.
- Cash/bank entry, voucher, reconciliation aur financial reports.
- Doctor order, nursing observation aur medication administration record.
- Medicine batch, expiry, stock issue aur low-stock alert.
- Employee attendance, leave approval aur payroll calculation.

- Task assignment, reminder, overdue escalation aur verification.
- Role restriction: unauthorized user sensitive record access na kar sakay.
- Audit log har important action capture kare.
- Backup se complete test environment restore ho.
- Mobile browser aur desktop par core workflows test hon.
- PDF/Excel exports aur A4 print layout verify hon.

Acceptance sirf tab di jaye jab agreed requirements pass hon, critical/high bugs resolve hon aur test evidence provide kiya gaya ho.

19. Developer Deliverables

- Complete working web application.
- All agreed modules and sub-options.
- Complete source code and version-control repository access.
- Database schema, ERD aur data dictionary.
- API documentation.
- Deployment and server configuration documentation.
- Owner super-admin credentials and recovery process.
- User manual and department-wise training.
- Test cases, UAT results and known-issues list.
- Backup and restore procedure.
- Third-party services, licences and recurring costs list.
- Warranty and maintenance support details.

20. Ownership and Contract Terms

- Custom-developed source code aur project-specific intellectual property contract ke mutabiq Jadeed Rifah ki ownership mein transfer ho.
- Domain, hosting, cloud account, database aur third-party accounts Owner ke control mein hon.
- Developer apne personal email/phone ko sole recovery owner na banaye.
- Milestone-based payment ho; advance limited aur written deliverables se linked ho.
- Har milestone ki demo, testing aur written acceptance ke baad payment release ho.
- Bug-fix warranty, response times, maintenance charges aur change-request rates contract mein likhe hon.
- Open-source aur paid components ki list aur licence terms disclose hon.
- Developer handover ke baad system ko lock, disable ya data hostage na kar sakay.
- Confidentiality aur patient data protection agreement sign ho.

21. Developer se Required Proposal

Software engineer se written proposal mein yeh details mangi jayen:

- Module-wise scope aur exclusions.
- Recommended technology stack aur architecture.
- UI/UX sample screens ya clickable prototype.
- Database/ERD approach.

- Project timeline aur team members.
- Phase-wise cost aur payment milestones.
- Hosting, domain, SMS/WhatsApp, AI API aur licence costs alag alag.
- Annual/monthly maintenance charges.
- Security, backup aur disaster recovery plan.
- Source code aur intellectual property handover terms.
- Post-launch support aur training plan.

22. Important Project Rules

- Developer written approval ke baghair scope ya workflow change na kare.
- Production mein dummy/test patient data use na ho.
- Real patient data migration sirf secure process aur authorized approval se ho.
- System mein clinical decisions licensed/qualified professionals ke control mein rahen.
- AI ko autonomous medical, legal, HR termination ya financial approval authority na di jaye.
- Critical medical alerts ke liye internet/software failure ka manual backup process bhi ho.
- System ka har module future mein expand aur configure kiya ja sakay.
- Final go-live se pehle data migration reconciliation aur backup restore test lazmi ho.

23. Final Project Objective

Jadeed Rifah Rehab ERP ka final maqsad aik aisa professional digital management environment banana hai jahan Owner ko complete visibility aur control hasil ho, General Manager daily operations chala sakay, departments apni responsibilities follow karein, patients ki care aur confidentiality protect ho, financial records transparent hon aur institution future mein multiple branches tak expand kar sakay.

Developer se request: Is document ko initial scope samajh kar detailed technical proposal, cost estimate, timeline aur implementation plan submit karein. Final development se pehle Owner ki written approval hasil karein.

END OF DOCUMENT
